**Remote deposit capture is changing the way banking is done.  
Vecmar is changing the way business does remote deposit capture!**

***Why Vecmar?***

For more than 26 years, Vecmar has been executing crucial sales, warranty and asset management services for the financial services industry. We offer customized fulfillment solutions for any size business. At Vecmar, we take the time to learn your needs like no other. It means discussing your goals, asking smart questions and understanding the challenges your business faces as if they were our own.

Our approach is simple – we partner with our clients to create customized solutions based on their exact needs. As a result, we provide a sustainable competitive advantage and faster growth for our customers.

***Why Partner with Us?***

- Bring additional value to your company while staying focused on core business objectives.
- Increase customer satisfaction with timely and reliable service.
- Deliver a higher, more measurable ROI.
- Access to new and remanufactured check scanners from name brand manufacturers.
- Gain the competitive advantage by leveraging Vecmar's expertise as an extension of your company.

## The Vecmar Advantage

Vecmar is the leading Check Scanner solution provider in the Financial Industry. We offer a complete scanner to merchant fulfillment solution delivering your Remote Data Capture deployment flawlessly from procurement to retirement. We provide the most comprehensive suite of managed services in the industry.

### Extensive Inventory

Vecmar stocks all major brands of check scanners, accessories, and related products. Visit our website at [www.vecmar.com](http://www.vecmar.com) for easy selection and ordering. Same-day shipping on orders placed before 5:00 PM.

### Advance Exchange/Depot Repair

Vecmar provides a variety of warranty options for your check scanning hardware. Customers can extend the length of the manufacturer's standard warranty or ship existing products to us for Depot Repair. We also offer an affordable Advance Exchange program. An Advance Exchange contract provides replacement hardware when the service call is placed – allowing the customer to return defective equipment after the replacement product is received. We make it easy to order, maintain and manage your remote capture operations.

### Custom Website

Our fulfillment services include the construction of a dedicated, secure website that can be customized to correspond to your corporate brand. The site can be assigned a unique URL and secure shopping cart. Our fulfillment services offer flexible pricing, online ordering, tracking and support services all in one convenient location.

### Asset Management

Vecmar's web-based ordering system enables customers to track and report inventory by location, serial number, age and repair history. This allows the customer to analyze the life-cycle management of its hardware throughout its organization.

### Support

We work closely with our customers before a sale to ensure that the products recommended are those that best meet the customer's needs. After the sale, Support Engineers work to isolate and identify problems quickly and efficiently.

### Technology Refresh

Designed to upgrade, refresh and remanufacture existing hardware. Fulfillment partners can trade in existing hardware for cash or credit towards new products.

### Canadian Fulfillment

Web-based with English and French language capabilities.
